

Fairfield Ditch Improvements – Phase 1

Project Fact Sheet

January 2019

Project Goals

1. Design and construct a project to improve the stream bank and provide long term erosion protection along the north bank of the Fairfield Ditch upstream of Belle Vista Boulevard;
2. Pilot test erosion control products to determine the effectiveness and feasibility of each for future projects along the Fairfield Ditch corridor.

Project Description

City Utilities is designing a project that will restore approximately 700 linear feet of the north bank of the Fairfield Ditch upstream of the Belle Vista Bridge. The project will also provide greater flood protection for several homes in the immediate area, by installing new gates on the storm sewers.

Design Manager

Kristen Buell, PE
