

FORT WAYNE CITY UTILITIES

FORT WAYNE

An affordable city with an abundance of water to meet your demands

With competitive rates among the lowest in the Midwest, City Utilities offers affordable, reliable and high-quality utility services that support economic growth in the community. In fact, *Forbes* magazine recognizes Fort Wayne as the city having the ninth lowest cost of doing business in the U.S.

That explains why companies are moving to Fort Wayne or expanding operations here – Franklin Electric, General Mills (warehouse/distribution), Walmart (milk packaging/distribution), GM (expansion), Sweetwater (expansion), Ash Brokerage (world headquarters expansion).

Water is a precious and valuable resource, as communities around the country face water supply shortages. Located where the St. Joseph and St. Marys Rivers join and form the Maumee River, Fort Wayne has an abundant water supply.

CITY UTILITIES

WATER THAT WORKS

Scott Glaze

President, Fort Wayne Metals

"Fort Wayne Metals is a proud customer of Fort Wayne City Utilities. We utilize over 500,000 gallons of water each month in the production of wire used in life-saving medical devices. As we near 50 years of manufacturing medical wire, we continue to count on the quality, pressure and reliability of City Utilities."

Water we can produce each day

72 million gallons

Average daily use

34 million gallons

Tap into our capacity and put it to work for your business!

Recognizing Your Needs

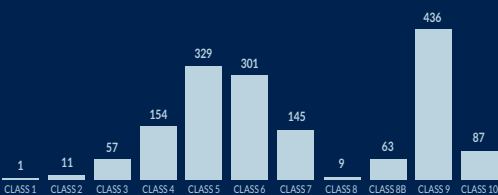

Your business needs a reliable supply of water with consistent quality and pressure. You also need services at an affordable price you won't find anywhere else in the region. Fort Wayne City Utilities delivers water that works for your business.

Protecting Your Investment

Our high-pressure water support is essential to fire flow capability and supports our excellent Fort Wayne Fire Department, even during peak demand periods. That's why Fort Wayne was given a high rating of a Class 2 Public Protection Certification (PPC) by the Insurance Services Office (ISO). Fort Wayne's rating ranks in the top 12 of the nearly 1,600 fire districts in Indiana and is one of only 1,100 out of 47,000 fire districts nationwide to receive a Class 2 or better. That high ISO rating is not only an honor; it reduces structure insurance in Fort Wayne and saves property owners a collective \$5.5 million each year on their insurance bill.

Insurance Services Office

Eric Lahey

Fire Chief, FWFD

"When we roll up to a fire, we count on having adequate water flow and pressure to do our job of saving lives and protecting property. Because City Utilities is able to consistently provide plenty of water where and when it's needed, our community has been able to maintain our high ranking in the state for fire protection services."

Tap into High Quality that Works

Consistently described by our customers as "superior," Fort Wayne's water is pre-softened to a consistent hardness and delivered at a reliable pressure and flow.

Hardness 122 mg/L

pH 8.3 — 9.3

Pressure 54 PSI

Tap into Waste Solutions

Our Water Pollution Control Plant offers a cost-effective solution for companies needing to dispose of their waste by-product, by either sending it down the pipe or having it hauled by truck. We partner with manufacturers to accept their waste and get it treated and even used to generate methane power at the treatment plant.

Investments in our sewer system have nearly doubled capacity in the past eight years. Use-based billing rewards conservation efforts and keeps your costs affordable and predictable.
